Information Management: A Proposal

Abstract

This proposal concerns the management of general information about accelerators and experiments at CERN. It discusses the problems of loss of information about complex evolving systems and derives a solution based on a distributed hypertext system.

Keywords: Hypertext, Computer conferencing, Document retrieval, Information management, Project control

World Wide Web

The WorldWideWeb (W3) is a wide-area hypermedia information retrieval initiative aiming to give universal access to a large universe of documents.

Everything there is online about W3 is linked directly or indirectly to this document, including an executive summary of the project, Mailing lists , Policy , November's W3 news , Frequently Asked Questions .

What's out there?
     Pointers to the world's online information, subjects , W3 servers , etc.
Help
     on the browser you are using
Software Products
     A list of W3 project components and their current state. (e.g. Line Mode ,X11 Viola , NeXTStep , Servers , Tools , Mail robot , Library)
Technical
     Details of protocols, formats, program internals etc
Bibliography
     Paper documentation on W3 and references.
People
     A list of some people involved in the project.
History
     A summary of the history of the project.
How can I help ?
     If you would like to support the web..
Getting code
     Getting the code by anonymous FTP , etc.
